Leibel To Win

Unfortunately, accidents happen and people get hurt. In cases like these whether an individual was being reckless, negligent, or if the accident was preventable the law provides recourse for victims of the accident. These recourses include a civil suit of a personal injury claim which is determined on the basis of a preponderance of evidence, such as if a person or entity was responsible for the accident and if so, how much they should be held liable for.

At Leibel Law, our North Georgia personal injury lawyers are committed to making sure that victims get the money that they need to take care of their medical bills, their families, and their future. We also represent families of those who have been killed in preventable accidents; compensation can be obtained for related medical bills, funeral expenses, and pain and suffering.
